

Polyphor is a clinical stage biopharmaceutical company based in Allschwil, Switzerland, and is focused on the discovery and development of antibiotics and other specialty pharma products for severe or life-threatening diseases. We are currently looking for a:

## 10065 Senior Scientist / Pharmacologist in Oncology

### Responsibilities:

- Project management of a drug discovery project
- Design and supervision of *in vivo* and *in vitro* studies at CROs and academic partners to support project advancement as necessary
- Establish complex PK/PD/efficacy models to generate supportive data for drug combinations and for specific cancer sub-indications
- Selection of *ex vivo* assays to broaden the understanding of the MoA in the tumor microenvironment, immune surveillance, angiogenesis and tumor growth control
- Translational science and exploratory biomarker work at clinical sites
- Management and supervision of preclinical study progress at CROs and academic partners. Discussion of study documentation, analysis and interpretation
- Written and verbal presentation within a multidisciplinary team environment

### Qualifications:

- PhD is required in immunology, oncology, pharmacology or related life sciences
- A minimum of 10 years industry experience with *in vivo* models selection and evaluation, standardization of models, design of PK/PD studies; hands-on expertise in cancer models is a plus
- Animal handling skills and hands-on *in vivo* pharmacology skills, including cell line work, preparation of test compounds, dosing, blood and tissue collection for PK and PD biomarker analysis
- Experience in preclinical and translational cancer pharmacology and/or pathology
- Knowledge about marker and pathway assessment, e.g. Nanostring, Simoa, other RNA and protein-based technologies and genomic approaches
- Basic knowledge about clinical operations is required, more is a plus
- Good scientific and business negotiation skills in discussions with external parties
- Sound and demonstrated project management skills

We are looking for an independent, self-confident person preferably with a well-established KOL network in preclinical and translational oncology. The ideal candidate is also used to guide a multidisciplinary project team and is able to manage timelines and priorities appropriately.

The position will be based in our Allschwil offices. Ideal start would be as soon as possible.
